This walk of 7 miles will start in a northerly direction on The Gritstone Trail, then travel Eastwards to Ely Brow via Snipe House. On our return we will use a little known path up to “THE NOSE” of Teggs Nose itself. Great views throughout and we finish in the historic quarry from which roadstone was hewn well into the 20th century and the equipment used is on public display. Clear geological formations are visible with explanatory notice boards for any interested parties.
